

**MRMIB Competitive Negotiation
External Quality Review Organization Proposers' Conference**

**Additional Questions and Responses
June 6, 2011**

This response to oral questions received on June 6, 2011, includes responses only to those questions MRMIB can answer at this time.

1. Is the 10 percent set-aside in Attachment B ten percent of the entire contract amount or a portion of it?

Answer:

Ten percent of the entire amount.

2. The cost for the focus studies may vary depending on the study. Do you expect a set price or are we able to give you a price range?

Answer:

You can provide a range of prices.

3. What should be the length of the plan specific and aggregate reports?

Answer:

The length of a plan-specific report will depend on the degree of compliance and improvement made by the individual plan. The detail should reflect all data and areas the EQRO has used to assess the health plan performance so that the individual health plan performance is clear to the reader. The report also should be clear about what needs to be done for the health plan to become compliant and improve its performance.
